

Please do not limit XM's ability to provide me with "locally oriented" content, including the new XM Instant Traffic & Weather channels.

When I travel, I use these channels to provide me with accurate weather and traffic information.

I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I am asking the FCC to reject the NAB's petition 04-160.

Thank you,

Jason Aguiar
